(54) DISPLAY DEVICE

(57)Abstract:

PURPOSE: To move a graphic form to a desired object accurately at a high speed by detecting inputted coordinate displacement on a touch panel and moving the graphic form to the same direction and distance in response to the detection speed.

CONSTITUTION: A transparent tablet 1 as a coordinate input means is overlapped on a display screen of a CRT display device 2. A coordinate display displacement detection means 401 and a graphic moving means 403 are connected to the CRT display device 2 and the transparent tablet 2. The movement of a finger inputted to a prescribed area on the touch panel 1, that is, the graphic moving command area 500 is detected by the coordinate displacement detection means 401 as the direction, distance and speed of the coordinate displacement and the graphic form 700 is moved in response to the detection speed.
